

Sprint 2 Report
Shelf Chef
The Shelf Chefs
11/02/21

Actions to stop doing:

- Forgetting to comment code
- Not frequently updating Jira board
- Having scrum meetings whenever instead of following the schedule

Actions to start doing:

- Merge more frequently
- Uniform code etiquette

Actions to keep doing:

- Helping with issues that group members had quickly
- Keeping each other updated on progress on discord channel
- Implementing things that build on top of each other early
- Talking out problems as a group
- Flexibility with meeting when someone gets stuck
- Helping each other on tasks that we get stuck on
- Posting useful resources to resources channel

Work completed this sprint:

- As an end user, I want a clean layout and navigation structure for this app, so that I can quickly find my way around the recipe generator's features.
- As an end user, I want to be able to have intuitive search capabilities for what ingredients I have in order to be able to find appropriate recipes.
- As an end user, I want the recipes to be displayed in a clear and concise manner so that reading and following the recipe is a simple process
- As an end user, I want a pleasant color palette in this app, so that there are no harsh colors, nor are there any hard-to-see areas.
- As a developer, I want an eye-catching logo for my app, as this way I can attract as many users as possible.

Work not completed this sprint:

- All items have been completed

Work completion rate:

- During Sprint 2, we were able to accomplish pretty much everything that we've planned to do. However, there are some items that need refinement, such as returning recipes in the order of least to most used ingredients, and implementing the UI for a clicked recipe, wherein missing ingredients are highlighted differently. Our total number of estimated ideal work hours completed during the prior sprint was 43 hours. There were a total of 14

days in the sprint and we completed an average of 1 user story every 3 days at an average of 3 work hours per day. Our average user stories per day across all sprints to date has been 1 user story every 4 days. Our average ideal work hours per day across all sprints to date has been 3 hours.
