

Sprint 3 Plan

Shelf Chef

11/3/21

Completion date: 11/16/21

Revision 1 11/3/21

Goal: Our primary goal for this sprint is to give the user the ability to create their own user profile (with an avatar picture, username and password), as well as the capability to like certain recipes, which will then be saved to their profile.

User Story 1:

- As an end user, I want to be able to customize my own profile, so that I can feel as if I'm an actual user of the app, not just an observer.
 - Task 1: Create user database table containing avatar, username, number of user created recipes, user id 1
 - Task 2: Button to access user creation page/edit profile page 3
 - Task 3: User profile creation page 5
 - Task 4: User profile put request 2
 - Task 5: User table query to get user information 2
 - Task 6: Create User Profile component to display avatar, username, number of user created recipes 3

User Story 2:

- As an end user, I want to be able to like recipes that I am a fan of, so that I feel that my opinion is heard
 - Task 1: Add like count to recipe table 1
 - Task 2: Add button to like recipe 3
 - Task 3: Display recipe like count on recipe display page 3
 - Task 4: Upon like by user, add recipe id to user fav table 3

User Story 3:

- As a developer, I want a tidy recipe database for optimized search times for the users
 - Task 1: Prune the recipes database of unnecessary recipes 5
 - Task 2: Update ingredients database to reflect Task 1 changes 3

Team Roles:

- Conner: Project Co Owner, Developer, Scrum Master
- Daniel: Developer
- Alexander: Developer
- Dennis: Project Co Owner, Developer

Initial Task Assignment:

- Conner: Story 1 - Task 2, 3, 4
- Daniel: Story 1 task 5; Story 1 task 6
- Alexander: Story 2 -- Task 1, 2, 3
- Dennis: Story 1 -- Task 1; Story 3 -- Task 1

Initial Burnup chart: (this is what we hope to achieve in this sprint)
