

Sprint 4 Plan

Shelf Chef

11/17/21

Completion date: 11/30/21

Revision 1 11/17/21

Goal: Our primary goal for this sprint is to address any outstanding organizational / graphical clean up tasks that resulted from features that were added or changed in previous sprint tasks.

User Story 1:

- As a Developer, I want well organized and easy to follow code so that I can better understand what the code is doing when I have to debug it.
 - Task 1: Comment code with description of what the code does along with applying a consistent variable naming schema 5
 - Task 2: Organize file hierarchy as well as remove unnecessary files 8

User Story 2:

- As a User, I want to be able to stay logged in to my account when I refresh the web page.
 - Task 1: Add local storage capability for user profile information 5

User Story 3:

- As a User, when I view a web application, I should see a visually pleasing color scheme and page layout that is consistent across the entirety of the application.
 - Task 1: Apply final color scheme to all elements 5
 - Task 2: Organize page layout across all elements 5

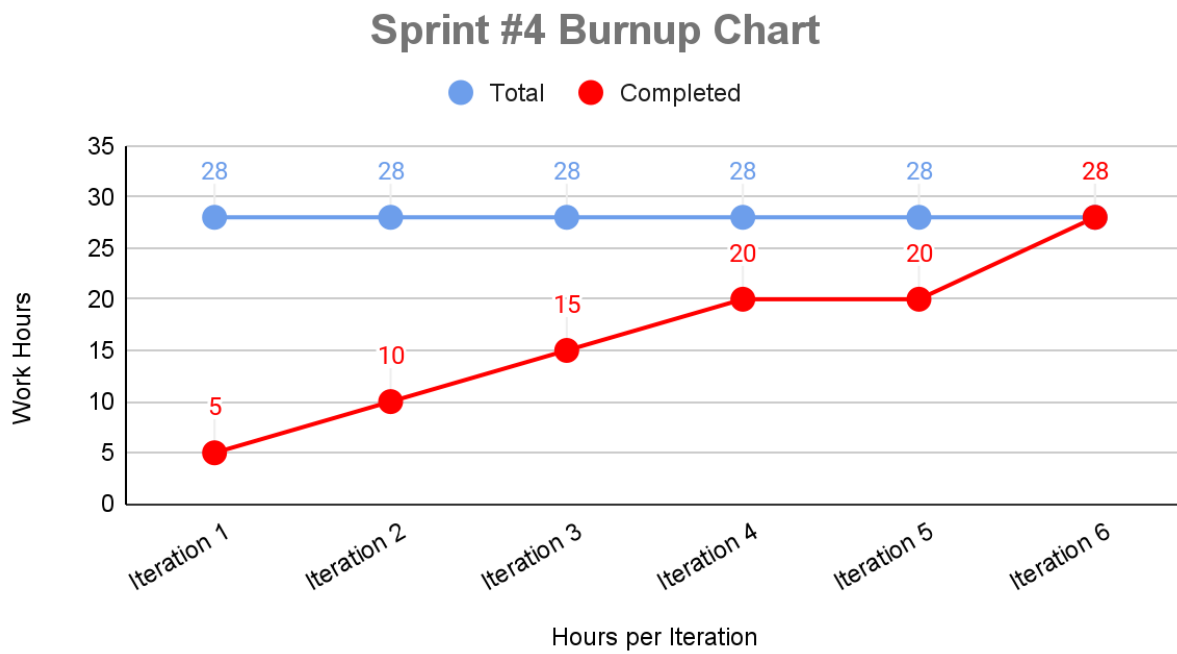

Team Roles:

- Conner: Project Co Owner, Developer
- Daniel: Developer, Scrum Master
- Alexander: Developer
- Dennis: Project Co Owner, Developer

Initial Task Assignment:

- Conner: User Story 2: Task 1
- Daniel: User Story 1: Task 1
- Alexander: User Story 3: Task 1
- Dennis: User Story 3: Task 2

Initial Burnup chart: (this is what we hope to achieve in this sprint)
