

Sprint 4 Report
Shelf Chef
The Shelf Chefs
11/29/21

Actions to stop doing:

- Continually pushing code to main branch

Actions to start doing:

- Addressing dependency file issues as soon as they arise
- Documenting code with comments that describe the functionality of the code

Actions to keep doing:

- Working well as a team
- Performing branch pull requests
- Static code analysis
- Impromptu team meetings to work on problematic tasks

Work completed this sprint:

- As a Developer, I want well organized and easy to follow code so that I can better understand what the code is doing when I have to debug it.
- As a User, I want to be able to stay logged in to my account when I refresh the web page.
- As a User, when I view a web application, I should see a visually pleasing color scheme and page layout that is consistent across the entirety of the application.

Work not completed this sprint:

- All items have been completed

Work completion rate:

- We completed all user stories that we set out to do
- Estimated ideal work hours for this sprint was 28
- Over 14 days, we averaged 1 user story every 4.6 days at an average of 2 hours per day
- Across all sprints, we averaged 1 user story every 3.7 days at an average of 2.4 work hours per day
